Slide 27: field 490 deleted \$a. Also, it was suggested that this example would benefit from an “on piece” example showing the numbering. We didn’t make this change, but are willing to receive examples.

Session 7:

The 2004 revision of AACR2 resulted in renumbering of rules and LCRIs for title changes in chapter 21. The changes simply resulted in a rearrangement of the rules for title changes so that the major and minor change definitions fall specifically under serials in 21.2. For example the references in the instructor notes of slide 1 was changed from:

AACR2 and LCRIs

21.2A1-21.2A2
LCRI 21.2A
21.2C + LCRI
21.3B1 + LCRI

To:

AACR2 and LCRIs

21.2C + LCRI
21.2C1
21.2C2
21.3B1 + LCRI

In the 2005 revision of the advanced workshop, specific references to the old rule numbering were changed in slides 8-9, 13, 15-19, 22-26. The excerpt from AACR2 for major and minor changes reflects the current numbering of the rules, 21.2C2a for major changes, 21.2C2b i-ix for minor changes (old rules were: 21.2A1 for major and 21.2A2 a-i for minor changes). All of the answers to the exercises in session 7 have been changed accordingly.

Other changes:

Minor wording changes were made on slides 2,4,5, 14 to remove the word “new”.

Slide 4: typo in word OCLC corrected

Slide 23: changed “vs.” to “versus” in 500 note

Slides 29,30,32, & 33: change of 245 indicators from 00 to 10

Slide 33: Also changed reference from LCRI 12.2F1a to: 21.3B.3, 12.2F
